**CITRUS FRUIT GUMS WITH AUTHENTIC NATURAL ALTERNATIVES TO CITRUS OILS,
NATURAL COLORS & VITAMIN C FROM ACEROLA**

Fresh, fruity, slightly sour: That is how people imagine citrusy sweets should taste. Oils from citrus fruits are frequently used in flavor compositions to deliver that authentic citrus taste. The challenge for the future will be procuring enough quality raw materials at an affordable cost – the demand for citrus oils is rising while many plantations are threatened by a plant disease known as citrus greening. For this reason, we have developed natural alternatives to citrus oils using the technology of green chemistry and plant materials to support our citrus flavor compositions. These alternatives are used in citrus fruit gums with coloring foodstuffs, with acerola powder, with high content of natural Vitamin C.
