Hot Shock

CHOCOLATE DRINK WITH REDUCED SUGAR CONTENT

During autumn at the sea, sitting at the fireplace after a winter stroll or simply at the kitchen table on a rainy day: Hot chocolate brings feelings of well-being and reward like almost no other drink. If only it didn't have so much sugar. Through sweetness optimization, we have developed products in the area of taste balance that help reduce sugar content while keeping the full taste profile – with natural flavors instead of artificial sweeteners.
