Part de Deux

A NATURAL ALTERNATIVE TO VANILLA EXTRACT FOR PETITE FOUR

Vanilla is one of the most popular tastes in the world – and is used as a natural flavor in our petit fours. We have continued to develop the flavoring component in the past years in many different directions, be they with phenolic, balsamic, vanillin, woody or creamy pudding notes. The flavors help create an authentic vanilla experience for consumers all over the world. The market for vanilla beans is extremely volatile. Prices are exceptionally high at the moment partly due to low quantities and low quality of the beans. This natural alternative tastes just as good as the original.
