VEGGIE FALAFEL & ITS HUMMUS

MEAT-FREE WITH VEGETARIAN HERITAGE

One of the biggest trends in the culinary world is the Middle Eastern cuisine. We are tapping into this with our falafel with hummus, a vegetarian dish which is prepared with special Middle-Eastern spices and herbs. These flavor combinations are part of a broad portfolio that embraces local and regional cooking – inspired by global network Chefs United, through which we have access to the expertise of 34.600 chefs. Furthermore the falafel is a good example for another trend: More and more people in the world – as many as half a billion – eat a diet that is entirely or at least partially vegetarian or vegan.
